Do you own a farm? Are you looking for ways to obtain a higher yield when the harvest comes? Do you want to cut energy costs and make your operations more efficient? Are you willing to make your business more sustainable and less harmful to the environment?

GEFF CAN HELP YOU ACHIEVE YOUR GOALS.

The Green Economy Financing Facility or GEFF is a product of the EBRD that helps businesses become more competitive and sustainable by enabling them to invest in green technologies. GEFF has already financed more than 202,000 projects dedicated to energy and resource efficiency as well as renewable energy. Valued at more than EUR 5 billion, these investments have led to a reduction in CO₂ emissions of over 9 million tonnes per year in 27 countries around the world.

WHY ARE GREEN TECHNOLOGIES BENEFICIAL FOR AGRICULTURE?

Green technologies provide a number of benefits for your agricultural business:

- Enjoy the same operating power while consuming less resources (such as water or fuel);
- Reduce the usage of nutrients and fertilisers for your crops;
- Grow your crops all year round with lower energy expenditures.

WHAT AGRICULTURAL TECHNOLOGIES ARE AVAILABLE UNDER GEFF FUNDING?

With GEFF financing, you will be able to purchase:
