Where finance and green technologies meet

Agricultural Value Chains

GEFF Tajikistan provides finance, investment grants and technical assistance to promote sustainable development and private sector investment. Farmers and businesses across agricultural value chains can adopt high-performing technologies to improve competitiveness and better manage natural resources. Investment grants, funded by the European Union, are available upon successful project completion and verification.

This project is funded by the European Union

In partnership with:

Who is eligible?

Eligible applicants are private sector companies and farmers:

- Micro, small and medium - sized enterprises* along the agribusiness value - added chains

- Investment grants in amount of **20% or 30%** of loan, are available upon successful completion and verification of the project

*Micro, small and medium - sized enterprises will adhere to the EU definition as per OJ L 124, 20 may 2003, p36

Eligibility assesment:

1 **GEFF** makes green financing simple and easy through **Technology Selector**, a special online tool for selecting the high efficiency technologies, that meet defined minimum performance requirements available at: www.ebrdgeff.com/tajikistan

2 Some green investments can benefit from specific solutions that are not obvious or available under the simple "pre-approved" approach. In these cases, the GEFF Tajikistan team provides expert advice at various stages of project implementation to ensure that the investment proposal is technically eligible, ensuring the most appropriate green technologies and services are financed using GEFF.

Examples of eligible technologies:

- Agricultural machinery

- Intensive orchards

- Irrigation pipes & pumps

- Greenhouses

- Drip irrigation systems

- Cold storages

- Agri processing equipment

Benefits of investing in high-performing, resource efficient technologies:

Reduced energy, water and resource consumption and related costs

Better yields, productivity and reliability of equipment

Business expansion along the agri-value chain

Improvements in product quality and competitiveness

Enhanced company image
