of EBRD finance.

More than
231,000
investments

10 million
tonnes of CO₂
emissions per year.

GEFF benefits the economy, environment, businesses, public entities and households by financing green investments!

GEFF IN TÜRKİYE

Green Economy Financing Facility Türkiye (GEFF Türkiye) is a programme developed by the European Bank for Reconstruction and Development (EBRD) to provide finance and technical assistance for implementing green economy investments including energy efficiency, renewable energy and climate resilience measures and to promote equal access to finance for both women and men-led sub-borrowers.

GEFF consultant team provides support to help residential, public and private sector beneficiaries identify and develop green sub-projects and prepare successful loan or lease applications under GEFF Türkiye. This technical assistance is funded by Clean Technology Fund (CTF), EBRD Shareholder Special Fund and the Türkiye – EBRD Cooperation Fund. The Facility Consultant for GEFF Türkiye is Stantec Türkiye.

GEFF Türkiye supports Türkiye's green economy transition with €500 million of financing by the EBRD and €21.5 millions of concessional financing funded by the Clean Technology Fund (CTF).

For the first time in GEFF programme, combined with green lending, GEFF Türkiye also aims to support mainstreaming of corporate climate governance (CCG) amongst participating financial institutions and end-beneficiaries. CCG refers to the rules, policies and processes of organisations, including financial institutions, use to identify, assess, manage and disclose risks and opportunities resulting from climate change.

You can always visit the official website (www.ebrdgeff.com/tr) to see which Participating Financial Institutions have already joined GEFF Türkiye.
